Connect to the Wireless Network Using a Windows 7 Computer

Step 1:
In the lower right corner of the screen (by your clock), locate and click the Network Connections icon. You should see a list of networks within range of your computer.

![Network Connections icon screenshot]

Step 2:
Locate and click SPCWifi, ensure that the Connect automatically option is checked, and click Connect.

Step 3:

After clicking **Connect**, you will be prompted for user credentials to enter.

*For SPC students, enter your credentials in the following format:*
Username: `<your student number>`
Password: `<your MySPC or Angel password>`

*For UPC students and faculty/staff, enter your credentials in the following format:*
Username: `spcollege\####UPC [e.g. spcollege\1234UPC]`
Password: `<your normal UPC account password>`

*For SPC faculty and staff, enter your credentials in the following format:*
Username: `admin\lastname.firstname [e.g. admin\doe.john]`
Password: `<your normal network password>`

*Example:*

After entering your credentials, click **OK** to continue to connect.

**IMPORTANT:** If you are a UPC student or instructor who is having login issues, please contact Wendy Berry at (727)394-6200. Other users should contact the Technical Support Desk at (727) 341-4357.

Step 4:

It is possible that you may receive this message due to local security settings on your computer. This is simply to protect your computer against malicious servers. Click the button next to **Details** to ensure that the server details are appropriate.
After clicking details, the **Radius Server** should be listed as `wireless.spcollege.edu` and the **Root CA** should be listed as *Go Daddy Class 2 Certification Authority*. If these values match, you are safe to continue connecting and click the **Connect** button.

**Step 5:**

After the connection process finishes, you should show that you are connected to **SPC Wifi**. You can now proceed with going to the Internet or doing other activities. This device will store your connection information until your password changes.
Please contact the Technical Support Desk at (727) 341 – HELP if you have continued issues connecting to the wireless network.
